

*Pablo by ADELE-C*

Pablo Picasso, over the years, has always found a different but precise identity. Pablo mirror recalls his portraits that can be defined as "front profiles." The intersection of the planes fades and splits the image, it dissolves our unitary perception.

*Bellagio by MARCHI CUCINE*

Bellagio is inspired by a classic style where elegance is never ostentation but an approach dictated by the search for compositional essentiality and formal perfection. A refined style with clear references to the Renaissance esprit of life in the villa.
